TEXT A:**'THE BEST OF BOTH WORLDS'**

- | | | |
|---|--|--------------|
| 1 | If you've always dreamed of travelling the world but would rather not give up on your education, then why not combine the two? Record numbers of people are now studying abroad, gaining once-in-a-lifetime travel experiences in far-flung places, and improving their job prospects in the process. You can go to China. Or Spain. Or you can keep things simple by studying in an English-speaking country like Canada or Australia. Quite literally, there is a whole world of options to choose from. | 5 |
| 2 | Just a couple of decades ago, the options for studying abroad were few and far between. Today the marketplace is positively crowded; so much so that it's difficult to know where to start. On the upside, this means you're very much the master of your own destiny. So, if you're serious about studying abroad, it's time to get planning. Where would you like to go? Is there a specific country, course or university that appeals to you? How does your "study abroad" plan fit with your long-term goals? | 10 |
| 3 | Studying abroad can also be expensive. Apart from the cost of the actual education you receive, there are additional expenses to think about – from flights and accommodation to food, sightseeing and insurance. The good thing is that international education is growing in popularity and opportunities for financial support are available. | 15 |
| 4 | For some, when they ask themselves, "Should I study abroad?", the choice is more about finding an excuse to get away from home and have a vacation. You will become more independent, immerse yourself in new cultures and languages, broaden your knowledge, and gain international perspectives – it is what you make of it. | 20 |
| 5 | Why study abroad when I can just travel? More like, "Why travel when you can study abroad?!" Not only does studying abroad give you the opportunity to travel and see the world. It also allows you to study and obtain a degree. Your connection to a foreign university may even make it easier for you to meet locals, immerse yourself in the culture, and make friends to go travelling with on the weekends. An international education might even give you new | 25

networks or show you career paths and subjects of interest that you would not have experienced in your home country. Studying abroad really is the best of both worlds!

- 6 One of the hardest things about moving to a different country is meeting new people. Luckily you can meet lots of other international students during your classes, events or you might even live with some of them! Even though it will be hard to miss your friends from home, you'll quickly find a new group of friends when studying abroad. 35
- 7 You'll also have to learn how to be away from your parents. Whether it's their advice, company or just them doing the chores around your house. It will be a big adjustment to not have them around anymore. In the beginning it might be difficult but they're only a phone call or text away, if you do need some reassurance from home. Being away from your parents can also be a good thing. You'll learn to become a lot more independent and how to organise your life on your own. 40 45
- 8 These are tricky issues to get to grips with, but programme advisors, lecturers, fellow students, friends and parents can all give advice and help you find a "study abroad" program that fits with your academic goals, your finances and, just as importantly, your personal interests. 50
- 9 The ideal study abroad experience will be a healthy balance between fun and learning, being social and being studious. If you arrive back home from your time abroad having found that balance, you can be satisfied knowing that you had the perfect international experience.

SECTION B: SUMMARY QUESTION 2

Read TEXT C below and using no more than 70 words **list SEVEN effective methods of preparing for examinations.**

INSTRUCTIONS

1. Your summary must be written in point form.
2. List your SEVEN points in full sentences, using no more than 70 words.
3. Write only ONE point per sentence.
4. Use your OWN words as far as possible.
5. Indicate the total number of words you have used in brackets at the end of your summary.

TEXT C

Preparing for examinations can be stressful, but it does not have to be. You may need to gauge the amount of time needed to study for the subject. If the study material is challenging for you to comprehend, start studying early to give yourself enough time to grasp content. There is no substitute for starting early with revision. It is equally important to compare the length and quality of your notes with those of other learners and content in your text- books.

The syllabus is an outline of everything to be studied therefore highlight topics and subheadings. As you read through the book, write down important details. Ensure that your notes fully cover the syllabus.

Some books have summaries of different topics. If you have no idea of what the summary is referring to re-read those specific topics.

Previous examination papers and memos may also provide the latest formats of different papers and how questions are formulated and answered. Practice the questions from different Papers and re-do those that you got wrong, making sure that you have practiced the right type of questions.

Based on evidence from research, a full night's sleep is necessary before the day of examinations as the brain needs time to digest the material studied. Read the summarized notes at least two hours before the examination session to refresh your memory.

QUESTION 5: LANGUAGE AND EDITING SKILLS

5.1 Read the passage (TEXT F) below, which has some deliberate errors and answer the set questions.

TEXT F**SCIENTISTS THINK COFFEE MIGHT BE EXTINCT BY 2080**

1. According to a report by The Climate Institute, rising temperatures could wipe wild coffee of the face of the planet sometime within the next sixty-four years. Researchers said that by 2050, the amount of suitable farmland for coffee is expected to have halved, as climate change sees a spread of plant-damaging fungi.
2. Not only that, but you could be noticing a difference in your coffee's quality sooner rather than later, as the climate change will alter the taste and aroma. And, as with all things that are rare, the cost of your coffee are bound to go up.
3. Even if you don't like coffee, this research is utterly devastating. It could impact the 120 million people worldwide whose livelihoods depend on coffee beans.
4. 'We have a cloud hovering over our heads,' said Mario Cerutti, a spokesperson from the coffee producer, Lavazza. 'Its dramatically serious. Climate change can have a significant adverse effect in the short term. It's no longer about the future; it's the present.'
